MOTORSPORT SIMULATIONS

**RACE WITH  
THE BEST!**

[iRacing.com](http://iRacing.com) - (n.) 1 a web-based racing simulation service allowing motorsport enthusiasts to race head-to-head, in precise replications of real-world cars and tracks. 2 the most realistic and authentic racing simulation ever created.

## ***iRacing.com is Internet Racing***

**Join the thousands already racing online at [iRacing.com](http://iRacing.com).**

- The **most accurate physics** available, based on real-world team data.
- Officially licensed, **real-world race cars** (oval and road).
- Officially licensed, precisely modeled, **world-class racing facilities**.
- **Season-long championships** with multiple series from rookie to pro.
- **Garage area:** Adjust car for performance or just get in and race.
- A real **sanctioning body** (FIRST) that manages all of the races and series.
- **iRacing World:** A social networking site dedicated to racing; forums, chats, and photo / video sharing.
- A **Dynamic experience:** New cars, tracks and features are constantly being introduced into our global community. Development never stops at [iRacing.com](http://iRacing.com).

Check out [www.iRacing.com](http://www.iRacing.com) for upcoming features and content including the World Cup of iRacing Club Championship, the iRacing Pro Series, and more...

*"iRacing is the most modern racing simulation ever created. Every inch of every track is modeled perfectly. I've used iRacing to learn new courses, or to keep the rust off at (other) tracks. For the sim racer, this is your dream simulation. For the real-world racer, this is your 'at-home' test vehicle. Even a rookie can get up to speed fast within the iRacing system."*

**Dale Earnhardt, Jr.** (NASCAR Sprint Cup Driver and 1998 /1999 NASCAR Grand National Series Champion)

*"This is far and away the most realistic driving simulation I've ever seen. The graphics are stunning, the tracks look virtually identical to the real thing, and the cars move and react in a way that will train you to be a better, smoother driver. I am addicted!"*

**Alex Gurney** (2007 Grand-Am Rolex Series Daytona Prototype Champion)

*"It's real seat time without the cost of taking the racecar to the track."*

**Chris Dyson** (2003 American Le Mans Series LMP675 Champion)

*"Being a rookie in the truck series last year, I used iRacing to help me learn the new racetracks. Not to mention racing on the sim is just plain fun!"*

**Colin Braun** (2008 NASCAR Camping World Truck Series Rookie of the Year)

System Requirements:

Standard home computers with a high-speed internet connection and decent graphical capability are compatible with the iRacing simulation software. The only additional hardware necessary is a steering wheel/pedal set-up. We recommend the Logitech G25, which is available through most major electronics retailers.
